Not with tons of every type of Jew (American) moving into Iceland. The Zionists from Utah area aka the humps, the big white ones from Canada with the big teeth and the ball shaped white Jews from south America as well as the Jews that call themselves Italian along with their Latino pikeys, it seems as if they are moving in heavily and the people with Leif ericsons genetics and the other vikings (Nordic Germanic people) are being bred out by these masses of American Jew cavepeople. I believe within one hundred years all records of Leif Ericson will be destroyed as well as the literature about the nederlanders and the Arabs murdering all the European settlers in Iceland , Greenland and Canada. The American Zionists lies about Columbus discovering America will be the only history to survive. This will better coverup the murders and genocide these sick American cavepeople have done to Europeans since Rome was destroyed. The mass murders they caused in Europe through war for thousands of years , setting up ww1 and ww2 with American caveman Churchill (Utah hump) along with sending scores of millions of European men to be murdered in Korea and Vietna. Two wars which only benefitted the cavepeople and Indians securing cocaine , coffee , opium and the entire conflicts in the middle east for oil for their ownership and benefit not the European americans. Now the question is will the Islamics keep dealing in oil with these mass murdering genocidal pig cavepeople indigenous to the Americas? Or perhaps change course and help fight the real problem. The ones who play every side of the fence, the ones who have no defense, the ones who deserve to burn , the ones whos hell is to turn. The Zionist is a caveperson indigenous to the Americas, and in being so has lied to all of us.

~ J. "Bearskin" Robbins

Salt water wash machine

The electrons I believe do not orbit the nucleus instead this so called "perfect material" is squished and squeezed in layers flattening and stretching it till it wraps around the neutron countless times in a blanket form wrapping and wrapping . The node in it is a small lump of energy that never becomes as equally flat as the rest of the energy jelly like blanket wrapping the neutron. When uranium is used many electrons form wrappings however hydrogens lack of plurality in electron blankets make it the easiest to split by bringing the temperature to absolute zero to slow it's actions of non situation from being squeezed by these eddy current like bands of electromagnetic energy (dark energy) that create boundaries for the electron jelly like energy blanket to be imprisoned in. When the electron slows the wrappings becomes shorter enabling the neutron to be accessed and disrupted causing a nuclear explosion by flicking the pellet of energies contained and interwrapped among themselves in the nucleus of the atom. Maybe.... I'm not sure I have a seventh grade education and YouTube to teach me from constant financial fraud and financial crimes by the Jews, latinos and Italians in my biological family and their organized crime groups in and out of the United states government. If I had an education I would have a lab and know for sure by now. But the electron seems to be in more of a state of non situation from pressures than it is in orbit from synergy of a different nature.

Dogs n cats many other so called "barbaric" countries allow strays. If the animals are homeless the USA kills them after they trap them and imprison them ,unless someone pays to take them, and then have the balls to call themselves the humane society or a humane country or descent people.

The American cavepeople Can not keep their hands off of animals. It seemsMust hurt them anyway possible. From pesticides, to raid to destroying their habitats building huge cities and putting bleach in all the fountains. The Americans seem like sociopaths to more evolved people because they are in fact modern day cavepeople who lost their tails much more recently than other species of human on earth.
These are unevolved cavepeople that can not let these animals alone.
 These are cave people actions like killing bugs. Killing bugs comes from living in unevolved societies where bugs bring you nutrition or disease with no medicines to cure themselves. These cave people (American Zionist) should not be in our society these are barbaric actions on helpless animals in our city's . These people have not developed enough emotionally to be around our countries animals or us. It's these barbaric cave women and men with global technologies in America that abduct , impression and then euthenise innocent animals. If your a homeless animal in the USA the humane society kills them. That's how fucked up the American cave peoples thinking is. They go out of their way to kill the countries dogs and cats and other animals if they do not have a home. Fuck the USA. Fuck the Jews. Fuck the cavepeople. It is terrible having to share a country with these people and now they are still in Europe after they caused 70 million deaths in ww2. These disgusting barbarians will not go home back to south America and the cave systems of Canada. It's absolutely disgusting having these Jews all through Spain , France , Italy , Germany , Netherlands and eastern Europe. When the fuck do these people and their Latinos go the fuck home. If we as white European people anywhere around the world have nukes now is the time to neutralize India, south America , central America and Canada to level these pigs.

Pigment harnessing, digging,magnetics

For instance a motorcycle ;
The metal parts are made from high heat , digging metals, and forming with pottery and cementios mixes . The rest is made from plastics and rubbers vulcanising with some pigments and coatings/paint. The machinery to make those parts and the entire factory lines were made with those same basic ideas.

For instance a building ;
The metal parts are made from high heat, digging metals , and forming with pottery and cementios mixes, the wires are the same except use an extruder to form them , the extruder was made from a combination of high heat, digging metals , and forming with pottery and cementios mixes. The wood is made from saws , hammer , nails or screws. The screw gun and all other tools are a combination of digging metals , high heat and pottery or cementios mixes to form the parts and whatever plastics and rubbers are used. The concrete is a cementios mix , the roofing tiles are made from high heat and digging clay or chiseling slate or digging tar and making paper or wood shingles from saws and chisels and files.

The silicon chip for example is a mixture of high heat and digging materials, the elements doping the electronics are a product of digging, high heat and chemical separation which comes from digging and high heat.

Our society is built of of less than 50 ideas and people that inspired everything else we experience human.

Bridge, <------ I left my keys in san Francisco.
 High on hippy hill.....
Magnetics.
